

In the Claims:

Please amend the claims as follows:

1. (Original) A method for use in determining the position of a user terminal,
comprising:
 receiving at the user terminal a digital television (DTV) broadcast signal transmitted by a
DTV transmitter;
 tracking a periodic component of the DTV signal using a delay-lock loop (DLL),
including
 selecting an observation interval based on the timing of the periodic component, and
 turning on a portion of the DLL during the observation interval, and turning the portion
off otherwise; and
 determining a pseudo-range between the user terminal and the DTV transmitter based on
the DTV broadcast signal; and wherein
 the position of the user terminal is determined based on the pseudo-range and a location
of the DTV transmitter.
